

### DESCRIPTION

A double-sided panel with gears that rotate to provide interesting visual effects. An additional rotating element in the form of a key is also included. Ideal for developing fine motor skills, supporting children's curiosity, and enabling discovery and sensory experience. Construction: load-bearing posts made from stainless steel pipes with a diameter of 76.1 mm; Anchoring: directly in the ground; Panel: made from flexible high-pressure polyethylene HDPE (15 mm); Steel components: fittings and connectors made from stainless steel.

### INFORMATION

|                          |                    |
|--------------------------|--------------------|
| Number of users          | 2                  |
| Age range                |                    |
| Device dimensions [m]    | 0,08 x 1,03 x 0,98 |
| Compliance with the norm |                    |
| Spare parts              |                    |

### SAFETY SURFACE

| Zone | Max height of fall [m] | Area [m <sup>2</sup> ] | Perimeter of safety zone [m] |
|------|------------------------|------------------------|------------------------------|
| A    |                        |                        |                              |
| B    |                        |                        |                              |
| C    |                        |                        |                              |
