

DESCRIPTION

The Retro Set 302 is an extensive playground that perfectly combines classic design with modern solutions. It consists of three sturdy platforms, providing various opportunities for play and climbing. Two slides made from HDPE panels recycled from fishing nets ensure safe play. The set includes various obstacles and bridges that develop children's motor skills while adding challenges and adventures. A high inclined entry ramp facilitates access to higher levels, while the climbing wall with stones encourages active play and climbing skills development. The natural wood used in the set blends perfectly with the surroundings, and advanced conservation methods ensure its durability and resistance to weather conditions.
